DANNER Tanicus 8in Coyote

SKU: 55316

Description

The Tanicus 8-inch Coyote boots feature a non-insulated design for lightweight comfort and versatile performance. The plain-toe construction provides a lighter feel and increased flexibility during break-in. A secure lace-up system helps prevent loose laces from snagging or dragging, while a stretch fabric pocket on the tongue keeps lace ends neatly tucked away. Weighing 39 oz per pair, these boots offer a comfortable balance of mobility, support, and durability.

Features

These boots feature a Danner Tanicus outsole with pentagonal lugs that provide maximum surface contact and reliable grip across various terrains. The polyurethane footbed delivers superior shock absorption with open-cell construction for improved airflow and comfort. The lightweight Bi Fit Board shank combines the shank, lasting board, and midsole into one structure, reducing weight while maintaining support and stability. A breathable mesh liner enhances ventilation and provides lasting foot comfort throughout the day.

Specifications

Weight	39 oz per pair
