Trijicon VCOG® 1-8x28 Ri-flescope - SCO

SKU: VC18-C-2400012

Description

The Trijicon 1-8x28 VCOG Commercial SCO is a battle-proven variable magnification riflescope built for both close-quarters engagements and long-range precision. Its forged 7075-T6 aluminum housing and ruggedized electronics deliver exceptional durability. The first focal plane MRAD reticle with wind holds offers accurate ranging and holdovers at every magnification. Powered by a single AA lithium battery, it provides up to 633 hours of runtime. A near-constant eye relief means no head or stock position adjustments are needed.

Features

The Trijicon VCOG features an integrated mount adapter that eliminates the need for ring base and provides quick and easy mounting to any rail system designed to fit the Trijicon ACOG. It offers easy adjustment with 11 brightness settings, integrated dial fin that allow easy rotation through magnification setting and easy-to set windage and elevation. First focal plane reticle allows to rapidly acquire target, and the multi-coated lenses provide superior clarity, plus light-gathering capabilities with zero distortion. The rifle scope offers bright, crips illumination with quick and accurate ranging reticles.

Specifications

Dimensions	10.93 x 2.91 x 2.8 in
Magnification	1-8x
Reticle Color	Day : Red Night: Red
Testing	Immersion tested to 20m, Solid Zero 5,000 consecutive rounds of heavy recoil , vibration tested, drop tested 2m, extreme environment tested -25F to 140F.
